CityStore.pk — Website Traffic & Conversion Report

GA4-style analytics · 1 May – 31 Oct 2026 (6 months, 184 days) · SAMPLE data — fictional online store, generated for this delivery (seed 20261113)

Headline: **202,793 sessions** from **150,351 users** produced **4,475 purchases** worth **PKR 12,910,349** — an overall conversion rate of **2.21%** and an average order value of **PKR 2,885**. Revenue grew **14.64% from May to October**.

Where the traffic comes from

Channel	Sessions	Share	Purchases	Conv.	Revenue (PKR)	AOV (PKR)
Organic Search	64,911	32.01%	1,628	2.51%	4,648,671	2,855
Social	40,544	19.99%	459	1.13%	1,080,756	2,355
Paid Search	36,506	18.0%	1,095	3.0%	3,465,351	3,165
Direct	28,420	14.01%	585	2.06%	1,553,520	2,656
Referral	16,230	8.0%	231	1.42%	518,968	2,247
Email	16,182	7.98%	477	2.95%	1,643,083	3,445

Paid Search converts best at **3.0%**; **Social** converts worst at **1.13%** despite 40,544 sessions — the most traffic that converts least. That gap is the first budget decision.

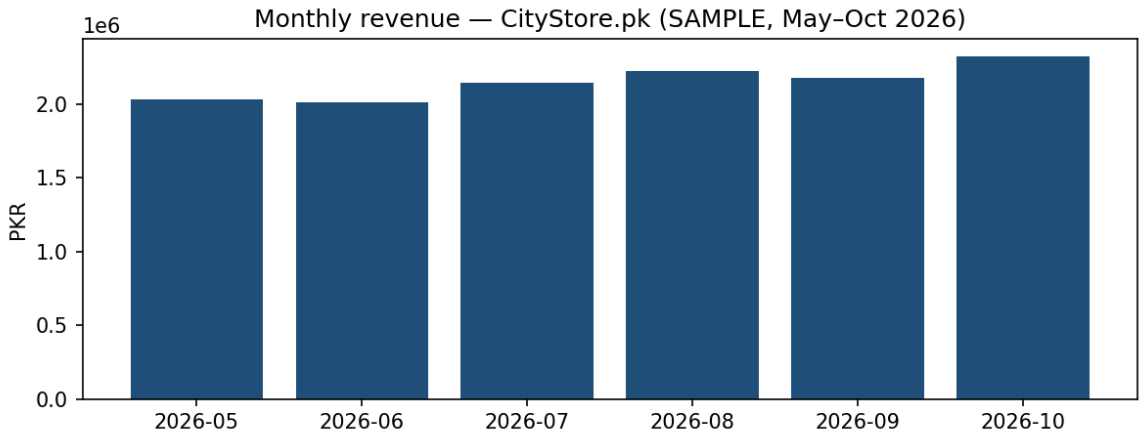
The funnel — where buyers drop off

Step	Count	Step conversion	Share of sessions
Sessions	202,793	—	100.0%
Product views	119,691	59.02%	59.0%
Add to cart	14,452	12.07%	7.1%
Checkout started	7,071	48.93%	3.5%
Purchase	4,475	63.29%	2.2%

The biggest leak is **product view → add to cart (12.07%)**: only about 12 in every 100 viewers reach the basket. Checkout → purchase holds at 63.29%, so the checkout itself is not the problem — the product page is.

Month by month

Month	Sessions	Purchases	Revenue (PKR)	Conv.	MoM growth
2026-05	32,139	701	2,029,953	2.18%	—
2026-06	31,601	697	2,010,379	2.21%	-0.96%
2026-07	33,440	738	2,142,270	2.21%	+6.56%
2026-08	34,805	776	2,224,324	2.23%	+3.83%
2026-09	34,393	757	2,176,363	2.2%	-2.16%
2026-10	36,415	806	2,327,060	2.21%	+6.92%



Best month: **2026-10 (PKR 2,327,060)**; worst: **2026-06 (PKR 2,010,379)**. Weekend days (Fri–Sun) average 1,209.9 sessions a day vs 1,019.3 on weekdays (+18.7%).

Landing pages & devices

Best-converting page: **/sale (2.85%)**; worst: /fashion/men (1.8%). Mobile is 69.1% of sessions but converts at 2.03% against Desktop's 2.81%. If mobile converted like desktop, the same traffic would be worth roughly PKR 3,658,444 more revenue.

3 recommendations

1. **Fix the view → cart leak first (12.07%).** Better photos, clearer prices and delivery info, and a visible add-to-cart button above the fold — before spending one more rupee on ads.

2. **Move budget from Social to Paid Search.** Social brings 40,544 sessions at 1.13% conversion; Paid Search converts at 3.0%. Same spend, more buyers.

3. **Fix mobile checkout.** Mobile is most of the traffic and the worst converter of the three devices. One-page checkout, JazzCash / Easypaisa / COD upfront, no forced account creation.

Method: every number above is recomputed from data/raw/daily_traffic_SAMPLE.csv (+ the landing-page and device splits) by src/analyze.py and verified by src/checks.py. The workbook (outputs/website_traffic_report_SAMPLE.xlsx) carries the same numbers as live formulas. Chart is a render of the same data, not a GA4 screenshot.
